PRODUCTS udder care

Wallaby system

Winner of the Prince Philip Award Certificate of Merit for the Best Presented Technical Exhibit at the European Dairy Event 1998 and Dairy Scot Best New Product Award. We have developed a new patented system which incorporates a dispensing pouch into a waterproof apron or belt. The discreet pouch can be loaded with a cartridge or pre-cut paper towels which feed through a dispensing aperture at the front of the apron. A protruding paper tab is easily extracted, and automatically pulls the next towel ready for use.

Can be used with dry wipes, wet wipes or both.

Apron
